Contents

1. UI	2
Procedure	2
Save / History	2
2. Models	2

IMPORTANT NOTES

- **NEXT MEETING – 13.05.2026 12:15**
 - **Document**
-

1. UI

Procedure

- Classify Document and extract all Features
 - o Classified WRONG:
 - User can change the Class
 - The Model gets retriggered and all Feature extraction Fields update (based on the new class)
 - o Classified Right -> nothing changes
- Result should just be a JSON (displayed in our UI), does not have to be saved – will be processed by companies' backend

Save / History

It is not a task to make it saveable

- We can if we want to

2. Models

- Try out different Models
- Document all outcomes
 - o good and bad models
 - o make a big file with all inputs
